2nd Newsletter
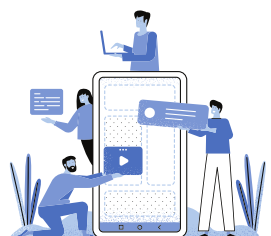

Advancing Vocational Competences in Soft Skills for IT Professionals

What we have developed so far in SayIT

The SayIT partnership has already developed the Soft Skills Curriculum for IT Professionals. The curriculum is a proposal of holistic approach towards upskilling IT professionals in the area of soft skills and can be used by VET institutions, regulatory bodies and relevant stakeholders. The first project result is characterized by a modular, competence-based framework enhanced by subsets of defined learning outcomes. The Curriculum is also based on a four-phase model, including planning, implementation, evaluation, and review, in accordance with the European Quality Assurance in Vocational Education and Training framework. The Curriculum covers five main thematic blocks, i.e., **Communication skills, Problem-solving skills, Teamwork skills, Organisational skills and Interpersonal skills**.

Download the full result, as well as the Curriculum brief, from the Results section on the project website.

What we are developing now

The SayIT partnership is currently developing the **Soft Skills Trainer App**. This second project result will be an innovative training tool for IT professionals that will allow them to develop soft skills and enhance their professional careers. We are now designing visual novel storyboards and training modules that will be implemented on Android and iOS devices next year.

More information on the mobile app in the next edition of the SayIT newsletter.

Partners' Meeting in Rotterdam, 3rd December 2021

The partnership met on-site in Rotterdam to discuss the next steps in the development of the Soft Skills Trainer Application and the progress of the project.
